## Made in USA

R&D Microwaves Unequal Power Dividers (re-active splitters) utilize a unique airline distributed capacitor construction that provides the lowest insertion loss, input VSWR, high power, and exceptional low PIM performance. The UD series are available in 1 dB coupling value increments up to 16 dB, with the highest values up to 30 dB, providing split ratios from 2:1 up to 1000:1. The units are provided with high torque connectors that are flange mounted to the housing chassis with O-rings for sealing for a robust and reliable connection. Mounting brackets and screws are supplied for easy wall mounting applications. All units achieve an IP68 environmental rating and are 100% tested to assure PIM spec compliance.
